### Short CV

Dr. Nikolaos S. Thomaidis, Professor of Analytical Chemistry at NKUA, leads a dedicated scientific group, Trace Analysis and Mass Spectrometry (TrAMS) group and has established a constant research activity in the last 25 years (293 papers and 17 book chapters, >10,100 citations, h-56). His current research interest is focused on the development of cutting-edge HRMS methodologies and workflows to fully characterize the molecular “fingerprint” of food, environmental and biological samples. Moreover, his research team has a significant, constant contribution on the thorough characterization of olive oil and products with presentations in international conferences and relative publications.
